

# Package #128

Apply silver ion (Ag+) antimicrobial coating to the shoulder prosthesis components

**Technology Maturity:** ENGINEERING\_DEFINITION

**Transfer Posture:** Sponsored Validation

**Problem:** Documented recurring problem 'adverse\_event\_without\_identified\_device\_' for shoulder prosthesis: 16 MAUDE reports across 8 distinct devices (20150515 to 20260529); root-cause evidence from 2 recall records and 10 event narratives (custody attached in the campaign report). MAUDE limitations: incidence UNKNOWN, causation UNVERIFIED (Art. XXI.5). Existing solutions fail because: Why existing solutions fail, per retrieved evidence: 2 recall root-cause descriptions (FDA enforcement records, custody attached); 10 MAUDE event narratives from this mechanism cluster (mdr\_text, custody attached). Statements are the providers' own words, cust Unresolved gap: Across the 3 relevant retrieved attempts (a bounded, non-exhaustive set), none measurably addresses: conditions, device, devices, events, failure, function, injury, intervention, introducing, maintain, matching, modes, must, problem, producing, prosthesis, rec

**Mechanism:** Antimicrobial coating of implants with silver to reduce periprosthetic joint infection

## Contents:

- 01 - Executive Technology Brief
- 02 - Engineering Technology-Transfer Dossier
- 03 - Buyer Decision Card
- 04 - Evidence Summary
- 05 - Transfer Manifest

*Status: ENGINEERING\_DEFINITION. Not physically validated.*
