

Package #118

Develop coronary stent with adaptive geometry that dynamically adjusts to vessel anatomy to minimize mechanical conflict

Technology Maturity: ENGINEERING_DEFINITION

Transfer Posture: Sponsored Validation

Problem: Documented recurring problem 'unknown__for_use_when_the_device_problem' for coronary stent: 14 MAUDE reports across 3 distinct devices (20080214 to 20080220); root-cause evidence from 1 recall records and 10 event narratives (custody attached in the campaign report). MAUDE limitations: incidence UNKNOWN, causation UNVERIFIED (Art. XXI.5). Existing solutions fail because: Why existing solutions fail, per retrieved evidence: 1 recall root-cause descriptions (FDA enforcement records, custody attached); 10 MAUDE event narratives from this mechanism cluster (mdr_text, custody attached). Statements are the providers' own words, cust Unresolved gap: Across the 2 relevant retrieved attempts (a bounded, non-exhaustive set), none measurably addresses: conditions, devices, events, failure, function, injury, intervention, introducing, known, maintain, matching, modes, must, producing, recurring, reported, unde

Mechanism: Lead conflict and lifetime consequences differ by TTVI modality

Contents:

- 01 - Executive Technology Brief
- 02 - Engineering Technology-Transfer Dossier
- 03 - Buyer Decision Card
- 04 - Evidence Summary
- 05 - Transfer Manifest

Status: ENGINEERING_DEFINITION. Not physically validated.
