
Toscanini 04 evidence summary

inv:fixturefluidics_hydraulic0e8d4aa7fcfb8 · run r541-ranked-pkg-battery-a · maturity
EARLY_TECHNICAL_EVALUATION · 3D class SYSTEM_3D

What this evidence supports

The evidence below supports the recorded technology: inv:fixture:fluidics_hydraulic:0:e8d4aa7fcfb8. Every classified span is custodied with its exact source identity and hash — the roles say what each span establishes for THIS invention, not for a generic problem.

Evidence by role

- Direct support: 0 — spans that state the claimed proposition
- Partial support: 0 — spans that support part of the claim
- Background: 0 — contextual, not claim-bearing
- Analogy: 1 — adjacent-domain transfer, weaker class
- Contradiction: 0 — spans that contradict the claim
- Unavailable sources: 0 — retrieval failures — absence is never evidence (Art. XXI.3)

Provenance

every classified span carries its evidence id and custody chain in the run record; the invention specification's `_evidence_index` maps claims to spans

Coverage limitations

coverage limitations: 0 retrieval failure(s) recorded; unknown records stay UNKNOWN (Art. XXV)

Epistemic boundary: DESIGNED / SIMULATED / EVIDENCE-SUPPORTED / EXPERIMENTALLY VERIFIED states come only from the canonical invention object. EXPERIMENTALLY VERIFIED requires real reality-loop evidence. Potential IP territory — formal legal review required. Toscanini performs technology discovery; patentability, claim drafting, infringement/FTO and legal opinions are matters for qualified IP counsel.
